Management  
Strategy**

The PEPPOL Life Cycle Management Strategy is a cross work package shared approach:

- ▶▶ Strategically, ensure that we have the right portfolio of specifications, services, components and tools to deliver the highest possible business value over time.
- ▶▶ Tactically, ensure that each set of specifications, services, components and tools is of the highest possible quality and used appropriately
- ▶▶ Operationally, ensure that services is used with highest possible quality

- ▶▶ Deliver consistent business value through:
  - ▶▶ Portfolio management
  - ▶▶ Consumption management
  - ▶▶ Creation and change management — manage the planning, definition, development, change and use
