eSignature Infrastructure Conformance Test Strategy

Conformance Test Strategy

▶▶ The goal: To enable stakeholders to claim conformance to the PEPPOL Signature Validation specifications and offer respective services and software.

▶▶ Possible Stakeholders:

    ▶▶ Service providers for signature/certificate validation services

        ▶ Conformance is a prerequisite to integrate a validation service into the PEPPOL validation infrastructure.

    ▶▶ Software providers for

        ▶ E-procurement software solutions

        ▶ Any software dealing with the validation of signatures

Conformance Test Principles

▶▶ Conformance is self claimed.

▶▶ Conformance has following targets:

    ▶▶ PEPPOL eSignature specification

    ▶▶ Common eSignature specifications and standards

▶▶ Aspects of conformance:

    ▶▶ Technical conformance

    ▶▶ Legislative conformance

    ▶▶ Security policy conformance

▶▶ Provisions for testing

    ▶▶ PEPPOL and common specifications and standards

    ▶▶ Test templates

    ▶▶ Reference implementations
